CJC:69026

1 December 1969

Dear Howard:

We are forwarding the enclosed Proposal CJC:69026 for a system of purging the telescope assembly. The proposal is submitted in response to suggestions by field personnel that a system be devised whereby the system could be purged externally. Purging the telescope in the present configuration requires that the dome assembly be removed and each side of the telescope purged separately. The purge system allows the telescope to be purged by removing only the system purge port and two screws from the manifold. A manifold assembly is installed inside the system purge port. The two chambers of the telescope are connected in a series using Tygon tubing. The tubing also connects the intake and vent port on the telescope to the manifold assembly. The telescope is purged by removing the system purge port and two screws of the manifold assembly and connecting nitrogen to one manifold port and venting through the other port for approximately five minutes.

Recent findings suggest that the telescope be purged at each preflight and post flight inspection. It is recommended that the proposed change incorporating the proposed purging system be accomplished in the next factory overhaul; however, if you do not feel that this is soon enough, field installation is feasible. Kits can be made available in about thirty days after approval from you.

Enclosure (1) is a summary of the cost to fabricate and install thirteen each surge systems, twelve for the production group and one spare.

Colin

Reference: AG-1103

Howard:

We have reviewed the referenced contract and have the following comments to offer:

- 1. It is our understanding that AG-1103 is strictly a repair contract. Outside of minor necessary materials, all new spare parts to be used with this contract will have originated under AG-1100 or AG-1104.
- 2. It is our further understanding that all work chargeable to this contract shall be authorized by a Depot Work Order or an approval from Headquarters. In effect there is no "sustaining" money in this contract; such sustaining requirements will be met under AG-1100 until 30 June 1970 after which a new contract will be negotiated.
- 3. We are unable to execute the certificate, page 3, of this contract since the holders of the Corporate seal are not cleared nor aware of the existence of this contract.
- 4. In accordance with the Changes Clause, it is requested that the following changes to Appendix I, Exhibit A to the contract be approved:
  - a. Under paragraph 3, besides the 11% materials charge, the computer automatically applies a 14.8% G&A as a DCAA approved charge. The 14.8% G&A, therefore, needs to be added to paragraph 3.
  - b. Under paragraph 4, travel costs, although covered by my outside checking account at cost, also are charged with a 14.8% G&A as "other costs" when I submit a request for additional funds for my account. The 14.8% G&A also needs to be added to paragraph 4.

With your concurrence of the foregoing, we are executing the AG-1103 Contract and forwarding herewith Copies 1 and 3.
